

# English for Professionals Exam

## A better way to accurately measure English fluency for global business professionals.

E^Pro™, the English for Professionals Exam, is an English proficiency test which measures the speaking, listening, reading and writing skills of individuals whose first language is not English. The test measures a candidate's English skills as they might be used by professionals in a corporate work environment. The exam questions utilize both British and US English styles.

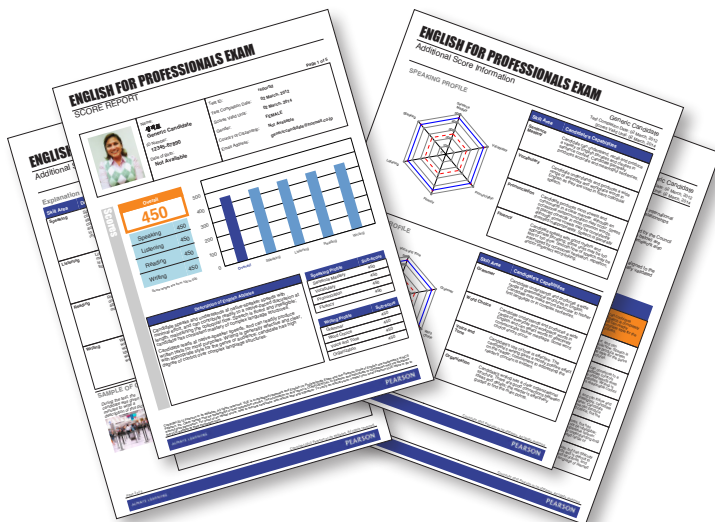

The E^Pro™ exam takes approximately 90 minutes and is made up of test items drawn randomly from a large item pool to ensure high test security. The test questions reflect many different workplace situations that require speaking, listening, reading and writing skills including telephone calls, email correspondence, dictation and summarizations. Tests are administered through Pearson VUE's secure test delivery software in a proctored test environment.

### Sophisticated automated scoring technology

Tests are scored within days using combined advanced automated scoring systems. The Knowledge Analysis Technologies™ (KAT) engine evaluates the meaning of text by examining whole written passages, and Versant technology uses advanced language processing and speech recognition technology to evaluate spoken responses.

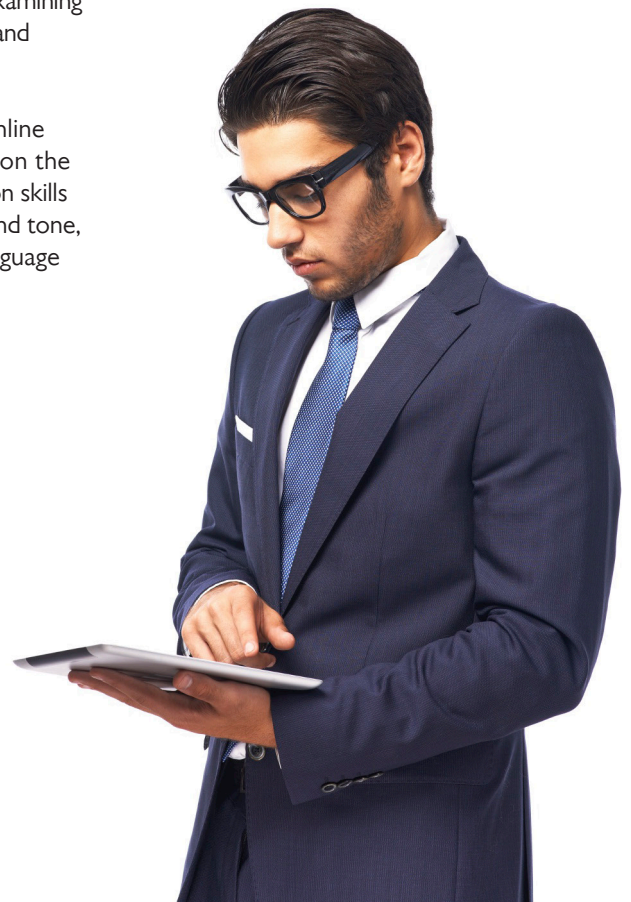

With automatic scoring technology, detailed score reports become available online within 3 business days for review or download—much faster than similar tests on the market. Score reports include an overall score with sub-scores for key communication skills such as fluency, pronunciation, word choice, sentence mastery, vocabulary, voice and tone, and reading comprehension. The report also includes detailed explanations of language capabilities.

Score report example

### Key Characteristics

1. Accurate, objective and reliable test scored by advanced language and text processing technologies to eliminate human and cultural bias.
2. On-demand, easily administered test can be taken at a candidate's convenience.
3. Time-saving administration and fast test results. The test takes about 90 minutes to complete and score reports become available online within days after the test is completed.

# Test Features
